

Swaham Pitambar Patra

Task 1

Print all odd numbers from 0 to 9. (Range with 1 Parameter)

The screenshot shows a Visual Studio Code editor with a file explorer on the left containing four files: task1.py, task2.py, task3.py, and task4.py. The editor is open to task1.py, which contains the following Python code:

```
1 # Print all odd numbers from 0 to 9. (Range with 1 Parameter)
2
3 for i in range(1, 10, 2):
4     print(i)
```

The bottom panel shows the 'TERMINAL' tab with the following output:

```
PS C:\Users\Swaham Patra\OneDrive\ITR Python+DS\Tasks 10-06> python -u "c:\Users\Swaham Patra\OneDrive\ITR Python+DS\Tasks 10-06\task1.py"
1
3
5
7
9
PS C:\Users\Swaham Patra\OneDrive\ITR Python+DS\Tasks 10-06>
```

Task 2

Print numbers from 10 to 1 in reverse. (Range with 2 Parameter)

The screenshot shows the Visual Studio Code editor with the file explorer on the left. The editor is open to task2.py, which contains the following Python code:

```
1 # Print numbers from 10 to 1 in reverse. (Range with 2 Parameter)
2
3 for i in range(10, 0, -1):
4     print(i)
```

The bottom panel shows the 'TERMINAL' tab with the following output:

```
PS C:\Users\Swaham Patra\OneDrive\ITR Python+DS\Tasks 10-06> python -u "c:\Users\Swaham Patra\OneDrive\ITR Python+DS\Tasks 10-06\task2.py"
10
9
8
7
6
5
4
3
2
1
PS C:\Users\Swaham Patra\OneDrive\ITR Python+DS\Tasks 10-06>
```

Task 3

Print all even numbers between 20 to 30. (Range with 3 Parameter)

The screenshot shows the Visual Studio Code editor with a file explorer on the left containing task1.py, task2.py, task3.py, and task4.py. The editor window displays task3.py with the following code:

```
1 # Print all even numbers between 20 to 30. (Range with 3 Parameter)
2
3 for num in range(20, 31, 2):
4     print(num)
```

The bottom panel shows the TERMINAL output:

```
PS C:\Users\Swaham Patra\OneDrive\ITR Python+DS\Tasks 10-06> python -u "c:\Users\Swaham Patra\OneDrive\ITR Python+DS\Tasks 10-06\task3.py"
20
22
24
26
28
30
PS C:\Users\Swaham Patra\OneDrive\ITR Python+DS\Tasks 10-06>
```

Task 4

Take a number as user input and print its multiplication table using a while loop with a single initialization.

The screenshot shows the Visual Studio Code editor with a file explorer on the left containing task1.py, task2.py, task3.py, and task4.py. The editor window displays task4.py with the following code:

```
1 # Take a number as user input and print its multiplication table using a while loop with a single initialization.
2
3 num = int(input("Enter a number of which you want the table: "))
4 print(f"Table of {num} is:")
5
6 i = 1 #Initialization
7
8 while i <= 10:
9     print(f"{num} x {i} = {num * i}")
10    i += 1 # Incrementation
```

The bottom panel shows the TERMINAL output:

```
PS C:\Users\Swaham Patra\OneDrive\ITR Python+DS\Tasks 10-06> python -u "c:\Users\Swaham Patra\OneDrive\ITR Python+DS\Tasks 10-06\task4.py"
Enter a number of which you want the table: 15
Table of 15 is:
15 x 1 = 15
15 x 2 = 30
15 x 3 = 45
15 x 4 = 60
15 x 5 = 75
15 x 6 = 90
15 x 7 = 105
15 x 8 = 120
15 x 9 = 135
15 x 10 = 150
PS C:\Users\Swaham Patra\OneDrive\ITR Python+DS\Tasks 10-06>
```
